combit on *Visual Studio Live! 2020* With List & Label Reporting Tool

Constance, 18 November 2020 – combit will present the new version 26 of its List & Label reporting tool at Visual Studio Live! (VSLive!) on the 2nd and 3rd of December. For more than 25 years, VSLive! has been considered one of the world's most highly esteemed developer conferences and will be held this year as a virtual event. In addition to numerous sessions on current issues covering all aspects of .NET and Visual Studio, attention will also be focused on exchanging knowledge and networking. "VSLive! provides us with a great opportunity for presenting the latest benefits of our reporting tool to our target group in the USA, such as support for .NET Core 3.1 and .NET 5," exclaims Jochen Bartlau, managing director of combit and head of product development for List & Label, concerning the event.

As one of the conference's Platinum Sponsors, combit will be on hand with its own virtual booth. Interested persons will be able to chat there directly with the developers of List & Label and take advantage of further information offerings. Special emphasis will be placed on recently published version 26 of the reporting tool with its optimized Report Designer, new output functions, improved PDF export, a Report Server based on new technology and lots of other updates.
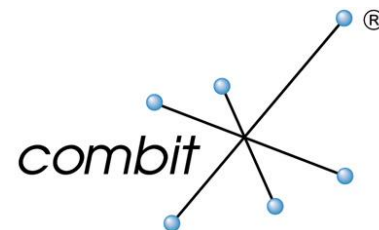

Further information concerning VSLive! 2020 including agenda and online registration option can be found here:

About combit

Since its founding in 1989, combit has successfully established itself in the software market in the areas of reporting, CRM and contact management with its List & Label development component and its business applications combit Relationship Manager. Over a hundred awards from the trade press and readers, as well as comments from numerous fully satisfied customers bear testament to the success of its products. Social responsibility and environmental protection are deeply embedded in the corporate values at combit. For this reason, the company sponsored children in Zambia and the Philippines, animal through the WWF and is committed to climate and environmental protection through annual donations. In 2013, combit was already honored as the "most environmentally friendly company with up to 500 employees" in the Office & Environment competition.

List & Label Product Description

Thousands of development teams and millions of end users all over the world use the award-winning List & Label reporting tool. Now in its 26th version, software developers have been adding powerful reporting functions to their applications with List & Label since 1992. Beyond this, the reporting tool provides access to all types of data preparation and data exchange – in classic applications as well as in web reporting and in the cloud. As compared with other reporting tools, List & Label offers the highest levels of flexibility with regard to the types of data which can be evaluated, supported programming languages and the number of export and barcode formats. The designer is available in several languages and can be integrated into the application without additional license fees. As a result, users are also able to create reports. Three editions of the reporting component are offered by German software house combit. The subscription variants include feature updates as well as a support flat rate. Installation and documentation are available in German and English.
